| 10.2 Strength of materials and parts                                                                                      |                  |   |                                                                    |
| 10.2.2 Corrosion resistance                                                                                               |                  |   | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures                                                                  |                  |   | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat                                                |                  |   | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                  |   | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation                                                                          |                  |   | Meets the product standard's requirements.                         |
| 10.2.5 Lifting                                                                                                            |                  |   | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.6 Mechanical impact                                                                                                  |                  |   | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.7 Inscriptions                                                                                                       |                  |   | Meets the product standard's requirements.                         |
|                                                                                                                           |                  |   |                                                                    |

| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
|----------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.                                                                                       |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.                                                                                           |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.                                                                                           |
| 10.9 Insulation properties                               |                                                                                                                                  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.                                                                                           |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.                                                                                           |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.                                                                                           |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

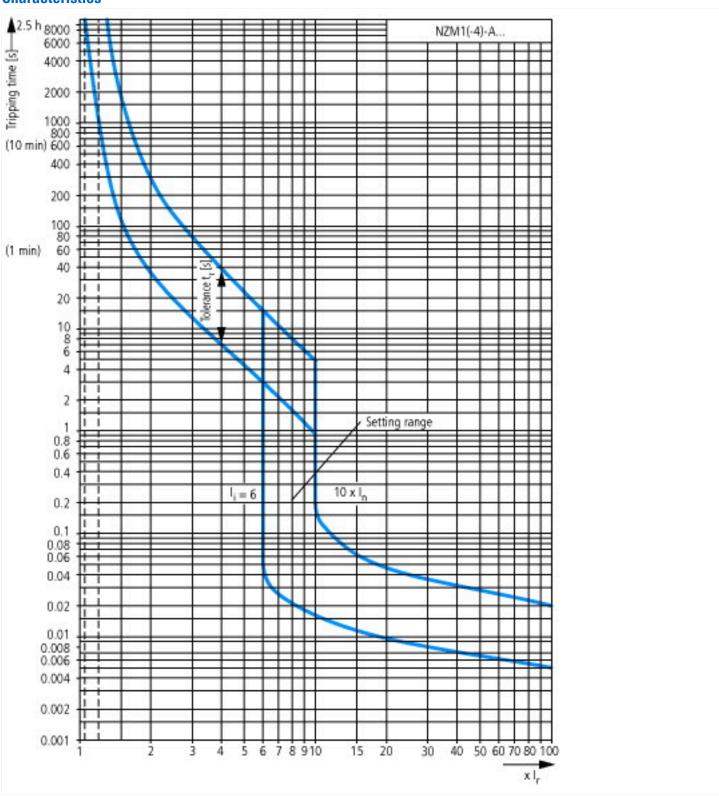

### **Technical data ETIM 7.0**

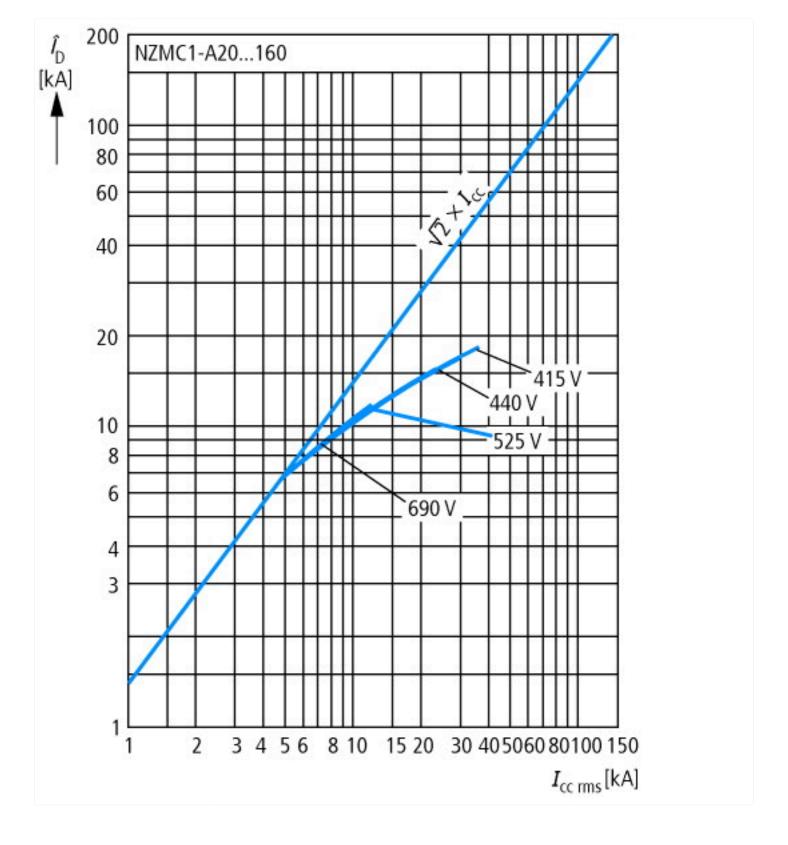

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC000228)

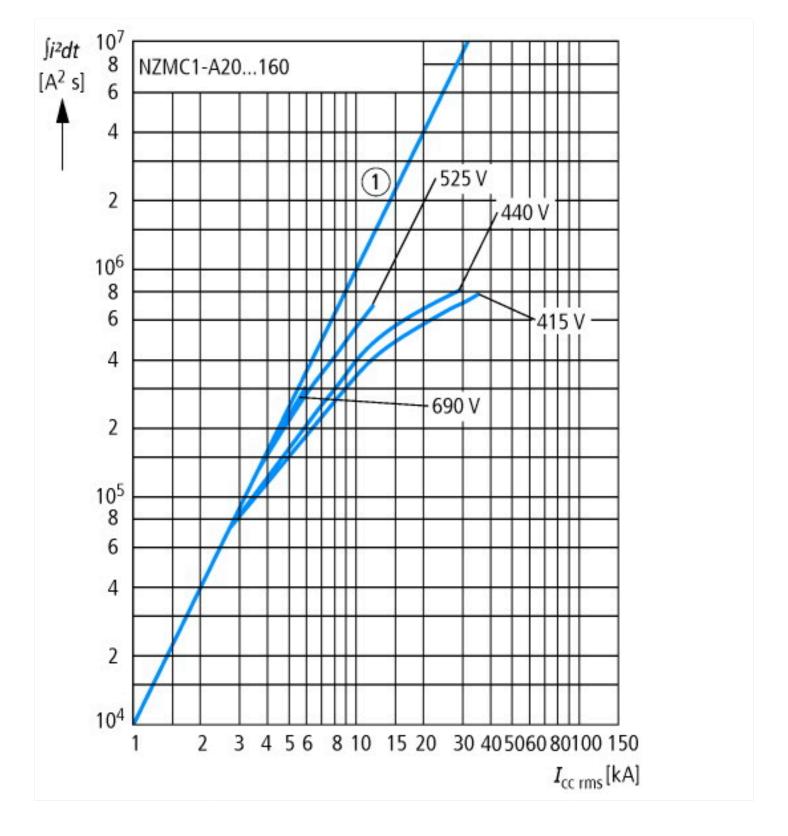

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013])

| protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013])         |    |                                          |
|-----------------------------------------------------------|----|------------------------------------------|
| Rated permanent current lu                                | Α  | 63                                       |
| Rated voltage                                             | V  | 690 - 690                                |
| Rated short-circuit breaking capacity Icu at 400 V, 50 Hz | kA | 36                                       |
| Overload release current setting                          | Α  | 50 - 63                                  |
| Adjustment range short-term delayed short-circuit release | Α  | 0 - 0                                    |
| Adjustment range undelayed short-circuit release          | Α  | 380 - 630                                |
| Integrated earth fault protection                         |    | No                                       |
| Type of electrical connection of main circuit             |    | Frame clamp                              |
| Device construction                                       |    | Built-in device fixed built-in technique |
| Suitable for DIN rail (top hat rail) mounting             |    | No                                       |
| DIN rail (top hat rail) mounting optional                 |    | Yes                                      |
| Number of auxiliary contacts as normally closed contact   |    | 0                                        |
| Number of auxiliary contacts as normally open contact     |    | 0                                        |
| Number of auxiliary contacts as change-over contact       |    | 0                                        |
| With switched-off indicator                               |    | No                                       |
| With under voltage release                                |    | No                                       |
| Number of poles                                           |    | 3                                        |
| Position of connection for main current circuit           |    | Front side                               |
| Type of control element                                   |    | Rocker lever                             |
| Complete device with protection unit                      |    | Yes                                      |
| Motor drive integrated                                    |    | No                                       |
| Motor drive optional                                      |    | No                                       |
| Degree of protection (IP)                                 |    | IP20                                     |
|                                                           |    |                                          |
