

LITECOM INF base license

Controller networking

Art. no. 22169787

LITECOM licence for networking LITECOM CCD controllers to a LITECOM Infinity system

Application

Licence for activating the LITECOM infinity mode and for networking several single LITECOM CCD Controllers to a LITECOM infinity system for the complete control of larger buildings with up to 100,000 addresses and for activating the LITECOM infinity functions.
The LITECOM infinity functions are an expansion of the LITECOM functions and are set with LITECOM infinity software programs.

Design notes

- For use with LITECOM infinity systems
- The license is project-specific and cannot be transferred to other projects

Functional description

With the LITECOM basis license, the basis functions of a LITECOM infinity system are activated and updated.

This license enables a total of up to 100,000 actuators to be controlled by several LITECOM CCD controllers operating in a network.

Basic functions:

- Activation of LITECOM Infinity mode of the controller
- Networking of several LITECOM CCD controllers to a LITECOM infinity system
- System-wide switching and dimming, calling scenes, activating motor actuators (curtains, screens, windows)
- System-wide calling of preset light scenes
- System-wide defining and saving of own light scenes
- System-wide configuration of functions at room or group level
- System-wide access to the system via own app on mobile devices for operating purposes
- System-wide creating of the project structure (rooms/groups/areas)
- System-wide facade protection. Wind, rain and temperature alarms via relay contacts or weather station
- Logbook; contains recordings of all modifications
- Fault monitoring in real-time
- System-wide system software update
- System-wide saving and loading of project settings (local and remote)
- Language changeover
- Locking of system and operation against unauthorised access
